Crowdstrike Falcon EDR Engineering

ADARMA

The Adarma Way

Determined threat actors and APTs are sophisticated, and resourceful in their efforts to evade and breach your cyber security defences. Fortunately, Crowdstrike Falcon provides your security team with a sophisticated, resourceful, and *rapid* set of protection/detection capabilities that can often stop breaches before they occur.

Cloud-based architecture, daily aggregation of endpoint events from millions of sensors deployed globally (analysed by powerful ML techniques), all deployed via a lightweight endpoint client allow you to prioritize, respond, and remediate with confidence.

Adarma's Crowdstrike Falcon engineers are skilled cyber security professionals, combining wide-ranging industry knowledge in threat intelligence, hunting, and remediation with proven expertise in the wider EDR landscape and Crowdstrike in particular.

Backed by a wider practice with years of expertise in designing, implementing, and maintaining SOC and SIEM systems for a range of FTSE 350 clients, our engineers will ensure your needs are met smoothly, efficiently, and reliably.

Beginning with a physical or virtual interactive workshop, we'll develop our understanding of your business and your needs, ensuring we translate them effectively into outcomes. Then we get down to delivery — installing, onboarding and configuring Crowdstrike Falcon in your environment as determined by best practice.

And when you're ready to delve deeper into other Crowdstrike Falcon — whether that's tighter integration with your existing SIEM and SOC solutions, more complex intelligence analysis, or extending your current solution's capabilities via Falcon's API - our team is ready to help.

Adarma's Delivery Team

• **Qualified, experienced engineers** with a background in cyber security and a specialisation in Crowdstrike Falcon. We'll always ensure that the ask meets the need — security is who we are.
• **Experienced in all aspects of** Crowdstrike Falcon installation, configuration, and development. We understand its context and capabilities as a tool in your security arsenal.
• **Immersed in the wider threat landscape** - we know threats proliferate rapidly and unpredictably. Staying aware of the big picture helps us help you target and prioritise the most critical vulnerabilities.

Why Adarma?

• **We've got the expertise you need** to successfully build and integrate end-to-end solutions and deliver value to your organisation.
• **We understand the design and purpose** of the platforms Splunk Crowdstrike monitors and integrates with — we speak your SME's language because we're natives.
• **We deliver value through the service** we implement and deliver — not upselling or vending licences.
