

## Phantom SOAR Engineering

### The Adarma Way

Security orchestration, automation and response (SOAR) capabilities allow analysts to improve efficiency and shorten incident response times, improving security and risk management by integrating teams, processes and tools together.

With Splunk Phantom, security teams can use the playbook model to automate tasks, orchestrate workflows, and work faster and smarter in supporting SOC functions.

Adarma's Splunk Phantom engineers are skilled cyber security professionals, combining wide-ranging industry knowledge in threat intelligence, hunting, and remediation with proven expertise in Splunk Phantom.

Backed by a wider practice with years of expertise in designing, implementing, and maintaining SOC and SIEM systems for a range of FTSE 350 clients, our engineers will ensure your needs are met smoothly, efficiently, and reliably.

Beginning with a physical or virtual interactive workshop, we'll develop our understanding of your business and your needs, ensuring we translate them effectively into outcomes.

Then we get down to delivery — installing, onboarding and configuring Splunk Phantom in your environment as determined by best practice.

And when you're ready delve deeper into Splunk Phantom's more powerful SOAR capabilities — whether that's tighter integration, more complex intelligence analysis, or custom playbook development and extension – our team is ready to help.

#### **Adarma's Delivery Team**

- Qualified, experienced engineers with a background in cyber security and a specialisation in Splunk Phantom. We'll always ensure that the ask meets the need – security is who we are.
- Experienced in all aspects of Splunk
   Phantom installation, configuration, and development. We understand its context and capabilities as a tool in your security arsenal.
- Wide range of development experience working with, developing and implementing a wide array of playbooks, from event enrichment to TI recursive investigations.

"By 2021, 70% of enterprise organisations with a dedicated SOC will include SOAR capabilities, up from less than 5% in 2018 and only 1% in 2017."

- Gartner

### Why Adarma?

- We've got the expertise you need to successfully build and integrate end-toend solutions and deliver value to your organisation.
- We understand the design and purpose of the platforms Splunk Phantom brings together — we speak your SME's language because we're natives.
- We hold Elite partner status with Splunk

   and were awarded Splunk's EMEA

   Partner of the Year 2019.
- We deliver value through the service we implement and deliver – not upselling or vending licences.
