

Security Operations Centre (SOC) Maturity Assessment

DATASHEET

Understand and improve the capability and maturity level of your SOC.

A threat-led SOC maturity assessment is critical for determining whether your organisation is properly prepared to defend against the threats you face.

It will identify gaps in your security operations and help you improve your strategy and decision-making.

The Adarma SOC Maturity Assessment will establish a clear roadmap for your future SOC programme. The assessment covers all areas of your SOC, including:

- Threat intelligence
- Vulnerability management
- Log management capabilities
- Security monitoring
- Security analysis
- Threat hunting
- Incident response
- Forensics

The Adarma SOC Maturity Assessment will evaluate your current level of security operations providing an overview of the positive and negative aspects of your operations and recommendations for improvement. We will provide an actionable roadmap to help achieve your desired maturity and capability level, within the parameters of your business context.

Why Does My Organisation Need a SOC Maturity Assessment?

We have helped many customers address issues related to changing threats, increasing alert volumes, and rising data costs. If you are facing any of the following challenges, a SOC Maturity Assessment may help you find a solution:

- My SOC data costs are increasing rapidly as the business scales.
- My analysts are burnt out due to the immense volume of incoming alerts.
- I need an achievable upgrade path to the latest technology.
- I need a baseline assessment of my SOC's current capabilities compared to industry peers.
- I need to improve productivity and maximise efficiency without increasing my headcount.

KEY BENEFITS OF A SOC MATURITY ASSESSMENT:

Pinpoint areas of improvement, understand associated costs, and support budget requests.

Validate and justify your SOC improvement plan in terms of business risk reduction compared to investment.

Understand how your SOC performs against relevant industry benchmarks.

Document evidence to support your SOC strategy and gain a realistic step-by-step action plan to achieve your desired future state.

WHY CHOOSE ADARMA'S SOC MATURITY ASSESSMENT?

- We are a support partner to the industry standard SOC-CMM. We contribute to the development of the standard and hold a silver support partner status to deliver SOC-CMM accredited assessments.
- We have a rich heritage in building and operating SOC's for the most threatened organisations in the UK and across many different industries. As a result, we are established as a trusted advisor to our FTSE 350 customers.
- Our deep understanding of risk, threat, and capabilities across security tools, data, and staff, enables us to provide a programmatic improvement plan that goes beyond just technical solutions.
- Our practical assessments deliver appropriate, actionable recommendations and focus on risk reduction and heightened resilience. We improve both SOC performance and maximise the value of your cybersecurity investments.
- Our long-standing Elite Technology Partnerships with leading security technology vendors provides access to impartial advice, accurate scoping, and engineering expertise. You can have the confidence that we can deliver on our recommendations.
- We have a comprehensive portfolio of supporting services designed to assist every aspect of your SOC. From operating model design, process design, innovative data management and SOC engineering services through to a fully managed service, we can help you achieve your desired SOC maturity.

We are Adarma

We are Adarma, independent leaders in detection and response services. We specialise in designing, building, and managing cybersecurity operations that deliver a measurable reduction in business risk. We are on a mission to make cyber resilience a reality for organisations around the world. Our team of passionate cyber defenders work hand in hand with our customers to mitigate risk and maximise the value of their cybersecurity investments.

Powered by Socket, Adarma's Security Operations Platform and optimised to our customers' individual needs, we deliver an integrated set of services that improve your security posture including best in class Managed Detection and Response services.

We operate with transparency and visibility across today's hybrid-SOC environments to ensure our customers are protected as they innovate, transform, and grow their businesses. Adarma delivers the cybersecurity outcomes you need to make a remarkable difference.

Engage with Adarma Assessments
